Item description

The WAGO I/O System 750 can also be used in marine applications and onshore/offshore installations (e.g., platforms, loading facilities). This is possible via certification under the standards of leading agencies such as Germanischer Lloyd and Lloyd's Register. This filter module ensures proper (certified) system operation. The module protects against high-energy disturbances on DC supply lines due to switching overvoltages caused by inductive loads. It contains a filter for the system supply and transient protection for both system and field supply. It is streamlined for use in systems with insulation monitoring and also offers the possibility of a ground fault test.

Indicators:

- LED (green): Power supply is available
- LED (red): Ground fault

Ground fault diagnostics (response values):

- Pre-alarm $50\text{ k}\Omega (\pm 15\%)$
- Main alarm $25\text{ k}\Omega (\pm 15\%)$
- Hysteresis (typ.) $25 \dots 30\%$
- Response time $\leq 5\text{ s}$ (typ. 2.5 s)
- Internal resistance DC (test circuit) $>10\text{ M}\Omega$ (test inactive), $>90\text{ k}\Omega$ (test active)
- Test current $\leq 180\text{ }\mu\text{A}$ ($\text{RF}=0\text{ }\Omega$)
- Permissible system leakage capacitance $\leq 2\text{ }\mu\text{F}$
